BANKING CLUE _____	PAIRALLEL _____

What's a "pairallel"? According to our definition—we made it up, so we get to define it, folks—a "pairallel" is a word or phrase from one field that has a word or phrase in another field that bears some resemblance to the first. In some cases, the second may rhyme with the first. In some cases, the word sound exactly the same, just being spelled differently. In other cases, the relationship may be more obscure.

Here is an example
